The complete roadmap to *prepare for FaMED*

EIGHT WEEKS · 54 SESSIONS · CASES AND PHRASES IN GERMAN

FaMED Protokoll 2026

SEE THE BOOK →

FAMED PREP

01 What you will find in this guide

An eight-week plan to organise steady, realistic preparation. It keeps the chapters, case lists and daily sessions of the original document. Adjust the workload to your level and the time you have available.

- Eight-week calendar, with several activities per day.
- Complete lists of practice topics for Anamnese, Aufklärung, Arzt–Arzt and writing.
- Ten common mistakes and how to correct them.
- SAMPLER, SBAR and OPQRST frameworks, with German expressions.
- Checklist and exam-day preparation.
- Practice resources from famedtestprep.com.

Complete English edition, revised 21 October 2026. Case names and the phrases you should practise remain in German. This is not an abridged selection of the guide.

Editorial note: the original contains inconsistent figures, timings and case counts. This edition keeps the training programme of the original but updates the description of the exam. The lists are topics to practise; they do not predict the exam questions. This edition replaces the earlier English version.

FaMED Protokoll 2026

The digital book brings together cases, conversation structures, professional expressions, vocabulary and examples of phrasing to practise alongside this plan.

SEE THE BOOK →

02 Understanding the FaMED exam

FaMED is a medical communication test in German for professionals seeking recognition of their qualification. Practise how to gather information, explain procedures, present patients and write a clear medical history.

The tasks are based on situations in general medicine, internal medicine and surgery. The information needed for the explanations and presentations is provided in the task. The aim is to communicate that information accurately, without inventing data.

The human medicine test has three stations: doctor–patient communication, doctor–doctor communication and a written station. Together they contain five tasks: one Anamnese, one Aufklärung, two patient presentations and one written medical history based on a video.

Use language the patient can understand and appropriate medical terminology with colleagues. The case histories may differ between tasks; do not carry information from one case to another.

Check the price, the venue, the recognition requirements and the date of results directly with the organiser and the authority handling your file. Your personal booking determines the time and arrival instructions.

Source for the current format: famed-test.de/pruefungsablauf/

FaMED Prep is a preparation resource independent of the exam organiser.

SEE THE FAMED PROTOKOLL 2026 BOOK →

03 Current structure and timings

1. Doctor–patient communication: 23 minutes, including reading time. It includes an Anamnese interview and an Aufklärung conversation. They do not have to concern the same case.
2. Doctor–doctor communication: 23 minutes, including reading time. It includes two patient presentations. Present the facts concisely, precisely and in an organised way, and answer questions using the information provided.
3. Written station: 22 minutes, including the video. Write the medical-history part of an Arztbrief based on the video. Write complete sentences, keep tenses and negations and use Konjunktiv I where appropriate.

The organiser specifies a maximum of eleven minutes for each oral situation. There is a one-minute break between stations. The written station is taken last.

How to use the timings in the calendar: the ten- or twenty-minute blocks in this guide are training exercises, not a new description of the official rules. For a full simulation, use the timings and instructions of the organiser's current test.

There are not two Anamnese interviews in the format described: there is one Anamnese and two patient presentations. The writing task does not require you to invent examinations, diagnoses or treatments that are absent from the video.

Source: famed-test.de/pruefungsablauf/

04 Case lists to practise

The following are topics from the original preparation material. They are language exercises, not an official guaranteed list of future questions.

Anamnese: 12 topics

1. Migräne
2. Vertigo/Tinnitus
3. Mandelentzündung (Tonsillitis)
4. Halsschmerzen/Fatigue/Covid
5. Bronchialkarzinom
6. Thoraxschmerzen
7. Bauchschmerzen
8. Knieverletzung
9. Knieluxation
10. Sprunggelenkverletzung
11. Kolonkarzinom
12. Ösophaguskarzinom

Aufklärung: 20 topics

1. Masteoidektomie
2. Appendektomie
3. Sigmoidektomie
4. Cholezystektomie
5. Thyroidektomie
6. Koloskopie
7. ÖGD
8. Koronarangiographie
9. TEE
10. elektrische Kardioversion
11. Bronchoskopie
12. Arthroskopie
13. Hüftgelenk
14. Kreuzbandriss
15. Perkutane Leberpunktion
16. Aszitespunktion
17. CT mit Kontrastmittel
18. MRT mit Kontrastmittel
19. Leistenhernie nach Lichtenstein
20. Hämorrhoidektomie

SEE THE FAMED PROTOKOLL 2026 BOOK →

04 Writing: cases and variants

Practise the written medical history for all these topics and their variants. The original wrongly splits ‘Bauchschmerzen’ across two rows; here it is kept as a single topic. In the real test, use only the information from the corresponding video.

1. Parkinson
2. Ösophaguskarzinom
3. Migräne 1
4. Migräne 2
5. Thoraxschmerzen 1
6. Thoraxschmerzen 2
7. Thoraxschmerzen 3
8. COVID-19
9. Husten 1
10. Husten 2
11. Fatigue und Leistungsabfall
12. Bauchschmerzen
13. Kolonkarzinom
14. Vertigo
15. Beinschmerzen

FaMED Protokoll 2026

The digital book brings together cases, conversation structures, professional expressions, vocabulary and examples of phrasing to practise alongside this plan.

SEE THE BOOK →

04 Arzt–Arzt: 32 topics

Practise two separate presentations per simulation session. The list includes respiratory, digestive, immunological, rheumatological, renal, haematological, endocrine, cardiovascular, neurological and trauma topics.

1. Pneumonie
2. Asthma bronchiale
3. COPD
4. Anaphylaktischer Schock
5. Akute Pankreatitis
6. Akute Cholezystitis
7. Appendizitis
8. Leistenhernie links
9. Divertikulitis
10. Gastritis
11. Obere gastrointestinale Blutung
12. Hämorrhoidalleiden
13. Morbus Crohn
14. Polyarthritis rheumatica
15. Akutes Nierenversagen
16. Pyelonephritis
17. Panzytopenie
18. Eisenmangelanämie
19. Entgleisung bei Diabetes mellitus
20. Hypertensive Krise
21. NSTEMI
22. Vorhofflimmern
23. STEMI (Hinterwandinfarkt)
24. Kopfplatzwunde
25. BPLS
26. Rippenfraktur
27. Oberschenkelhalsfraktur
28. Schlüsselbeinfraktur
29. Kreuzbandriss und Meniskusschaden
30. Sprunggelenkfraktur
31. Mittelhandfraktur
32. Humerusfraktur

SEE THE FAMED PROTOKOLL 2026 BOOK →

05 Communication frameworks

SAMPLER: an aid to organise the Anamnese

S: symptoms	*"Was führt Sie zu uns?"*
A: allergies	*"Haben Sie Allergien?"*
M: medication	*"Welche Medikamente nehmen Sie?"*
P: past history	*"Haben Sie Vorerkrankungen?"*
L: last meal	*"Wann haben Sie zuletzt gegessen?"*
E: events	*"Was ist passiert?"*
R: risk factors	*"Rauchen Sie? Trinken Sie Alkohol?"*

OPQRST: exploring pain

Onset	*"Seit wann haben Sie die Schmerzen?"*
Provocation	*"Gibt es einen Auslöser?"*
Quality	*"Wie würden Sie die Schmerzen beschreiben?"*

Practise: dumpf, stechend, drückend, brennend.

Radiation	*"Strahlen die Schmerzen aus?"*
Severity	*"Auf einer Skala von 1–10?"*
Time course	*"Sind die Schmerzen konstant oder intermittierend?"*

SBAR: organising an Arzt–Arzt presentation

S: situation; practise a short opening of about thirty seconds.

> *"Guten Tag, Herr/Frau Chefarzt. Ich möchte Ihnen [Name], [Alter] Jahre alt, vorstellen. Der Patient wurde heute wegen [Beschwerden] aufgenommen."*

B: background, medical history, vital signs and examination findings provided.

A: assessment, tests, imaging and working diagnosis available.

R: diagnostic plan, treatment and next steps stated in the task.

You can spend about two minutes on each block when training. They are organisational aids, not an official marking scheme or a reason to invent information.

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 1: Foundations and Anamnese

Monday — Structure and assessment

- [ ] MORNING Read the exam structure and the preparation material. · 1 h
- [ ] AFTERNOON Understand the three stations and their five tasks. · 65 min
- [ ] EVENING Assess your German level with a C1 practice test. · 30 min

Tuesday — SAMPLER framework

- [ ] MORNING Learn how to use SAMPLER. · 1 h
- [ ] AFTERNOON Practise SAMPLER with Migräne. · 1 h
- [ ] EVENING Practise with Thoraxschmerzen. · 45 min

Wednesday — OPQRST for pain

- [ ] MORNING Master the OPQRST questions. · 1 h
- [ ] AFTERNOON Practise with Bauchschmerzen. · 1 h
- [ ] EVENING Practise with Knieverletzung. · 45 min

Thursday — Anamnese practice I

- [ ] MORNING Interview on Migräne in the app. · 1 h
- [ ] AFTERNOON Interview on Vertigo/Tinnitus. · 1 h
- [ ] EVENING Interview on Mandelentzündung. · 45 min

Friday — Anamnese practice II

- [ ] MORNING Work on Halsschmerzen/Fatigue/Covid. · 1 h
- [ ] AFTERNOON Work on Bronchialkarzinom with sensitivity. · 1 h
- [ ] EVENING Distinguish cardiac and non-cardiac chest pain. · 45 min

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 1: Foundations and Anamnese

Saturday — Anamnese practice III

- [ ] MORNING Bauchschmerzen, Knieverletzung and Knieluxation. · 90 min
- [ ] AFTERNOON Sprunggelenkverletzung and Kolonkarzinom. · 1 h
- [ ] EVENING Ösophaguskarzinom: practise empathy. · 1 h

Sunday — Review and trial interview

- [ ] MORNING Review all the Anamnese topics on the list. · 1 h
- [ ] AFTERNOON Do two random interviews as training. · 30 min
- [ ] EVENING Rest and prepare for the second week. · Rest

FaMED Protokoll 2026

The digital book brings together cases, conversation structures, professional expressions, vocabulary and examples of phrasing to practise alongside this plan.

MY NOTES FOR THE WEEK

06 Week 2: Aufklärung: explaining procedures

Monday Basic surgery

- [ ] MORNING Mastoidektomie: ENT procedure. · 1 h
- [ ] AFTERNOON Cholezystektomie: laparoscopic surgery. · 1 h
- [ ] EVENING Sigmoidektomie: bowel surgery. · 1 h

Tuesday Surgical practice

- [ ] MORNING Appendektomie: emergency surgery. · 1 h
- [ ] AFTERNOON Leistenhernie nach Lichtenstein. · 1 h
- [ ] EVENING Hüftgelenk: orthopaedic surgery. · 1 h

Wednesday Endoscopic procedures

- [ ] MORNING ÖGD: upper gastrointestinal endoscopy. · 1 h
- [ ] AFTERNOON Koloskopie: colonoscopy. · 1 h
- [ ] EVENING Bronchoskopie: bronchoscopy. · 1 h

Thursday Heart and vessels

- [ ] MORNING Koronarangiographie: cardiac catheterisation. · 1 h
- [ ] AFTERNOON TEE: transoesophageal echocardiography. · 1 h
- [ ] EVENING Elektrische Kardioversion. · 1 h

Friday Orthopaedics and other procedures

- [ ] MORNING Arthroskopie: knee arthroscopy. · 1 h
- [ ] AFTERNOON Thyroidektomie: thyroid surgery. · 1 h
- [ ] EVENING Hämorrhoidektomie. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 2: Aufklärung: explaining procedures

Saturday Imaging and interventions

- [ ] MORNING CT Thorax mit Kontrastmittel. · 1 h
- [ ] AFTERNOON MRT mit Kontrastmittel. · 1 h
- [ ] EVENING Perkutane Leberpunktion and PTA; also review Aszitespunktion. · 1 h

Sunday Aufklärung review

- [ ] MORNING Review the first ten procedures. · 90 min
- [ ] AFTERNOON Review the remaining procedures. · 90 min
- [ ] EVENING Practise a random selection in the app. · 1 h

FaMED Protokoll 2026

The digital book brings together cases, conversation structures, professional expressions, vocabulary and examples of phrasing to practise alongside this plan.

MY NOTES FOR THE WEEK

06 Week 3: Arzt–Arzt I: respiratory, heart and digestive

Monday Respiratory cases

- [ ] MORNING Pneumonie 1: presentation with SBAR. · 1 h
- [ ] AFTERNOON Pneumonie 2: a different presentation. · 1 h
- [ ] EVENING Asthma bronchiale: acute exacerbation. · 1 h

Tuesday COPD and consolidation

- [ ] MORNING COPD: interpreting blood gases. · 1 h
- [ ] AFTERNOON Practise the four respiratory exercises. · 90 min
- [ ] EVENING Practise the passive voice and nominal style. · 1 h

Wednesday Cardiovascular cases

- [ ] MORNING Vorhofflimmern: case presentation. · 1 h
- [ ] AFTERNOON NSTEMI: acute coronary syndrome. · 1 h
- [ ] EVENING Hypertensive Krise: emergency. · 1 h

Thursday Cardiac practice

- [ ] MORNING Practise the three cardiovascular cases above. · 90 min
- [ ] AFTERNOON Interpret the ECG and troponin from the exercises. · 1 h
- [ ] EVENING Review emergency vocabulary. · 1 h

Friday Digestive I

- [ ] MORNING Komplizierte Appendizitis. · 1 h
- [ ] AFTERNOON Gastritis: upper digestive tract. · 1 h
- [ ] EVENING Divertikulitis: lower digestive tract. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 3: Arzt–Arzt I: respiratory, heart and digestive

Saturday Digestive II

- [ ] MORNING Pankreatitis: vocabulary and the Ranson criteria from the exercise. · 1 h
- [ ] AFTERNOON Chronische Cholezystitis. · 1 h
- [ ] EVENING Gastroblutung: presenting a gastrointestinal bleed. · 1 h

Sunday Respiratory, cardiac and digestive review

- [ ] MORNING Review the thirteen exercises of the week. · 2 h
- [ ] AFTERNOON Practise five random cases. · 90 min
- [ ] EVENING Rest. · Rest

MY NOTES FOR THE WEEK

06 Week 4: Arzt–Arzt II: trauma and other systems

Monday Trauma I

- [ ] MORNING Kreuzbandriss: anterior cruciate ligament injury. · 1 h
- [ ] AFTERNOON Rippenfraktur: rib fracture. · 1 h
- [ ] EVENING Kopfplatzwunde: head laceration. · 1 h

Tuesday Trauma II

- [ ] MORNING Schlüsselbeinfraktur: clavicle. · 1 h
- [ ] AFTERNOON Oberschenkelhalsfraktur: femoral neck. · 1 h
- [ ] EVENING Sprunggelenkfraktur: ankle. · 1 h

Wednesday Trauma III

- [ ] MORNING Mittelhandfraktur: metacarpal. · 1 h
- [ ] AFTERNOON Humerusfraktur: humerus. · 1 h
- [ ] EVENING Practise the eight trauma cases. · 1 h

Thursday Other systems I

- [ ] MORNING Anaphylaktischer Schock: emergency. · 1 h
- [ ] AFTERNOON BPLS: benign paroxysmal positional vertigo. · 1 h
- [ ] EVENING Diabetes mellitus: decompensation. · 1 h

Friday Other systems II

- [ ] MORNING Leistenhernie: inguinal hernia. · 1 h
- [ ] AFTERNOON Pyelonephritis: kidney infection. · 1 h
- [ ] EVENING Morbus Crohn: inflammatory bowel disease. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 4: Arzt–Arzt II: trauma and other systems

Saturday Final Arzt–Arzt cases

- [ ] MORNING Polyarthritis: vocabulary on rheumatoid arthritis. · 1 h
- [ ] AFTERNOON Niereninsuffizienz: renal failure. · 1 h
- [ ] EVENING Random selection from the set of presentations. · 90 min

Sunday Full review of presentations

- [ ] MORNING Review the cases by system, including the haematological ones. · 2 h
- [ ] AFTERNOON Practise the presentations in the app. · 90 min
- [ ] EVENING Rest. · Rest

MY NOTES FOR THE WEEK

06 Week 5: Arztbrief: written documentation

Monday Structure and Konjunktiv I

- [ ] MORNING Learn the structure of the text and the written medical history. · 1 h
- [ ] AFTERNOON Study the rules of Konjunktiv I. · 1 h
- [ ] EVENING Convert direct speech into indirect speech. · 1 h

Tuesday Writing I

- [ ] MORNING Migräne: use the app's writing exercise. · 1 h
- [ ] AFTERNOON Vertigo: write within a twenty-minute practice limit. · 1 h
- [ ] EVENING Kolonkarzinom: write the medical history. · 1 h

Wednesday Writing II

- [ ] MORNING Parkinson: written medical history. · 1 h
- [ ] AFTERNOON Ösophaguskarzinom: written medical history. · 1 h
- [ ] EVENING Thoraxschmerzen: written medical history. · 1 h

Thursday Writing III

- [ ] MORNING Fatigue und Leistungsabfall. · 1 h
- [ ] AFTERNOON Erkältung/Covid: written medical history. · 1 h
- [ ] EVENING Bauchschmerzen and Husten mit Sputum. · 1 h

Friday Speed and revision

- [ ] MORNING Write three timed twenty-minute exercises. · 90 min
- [ ] AFTERNOON Write three more exercises. · 90 min
- [ ] EVENING Review the six texts and find the mistakes. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 5: Arztbrief: written documentation

Saturday Advanced practice

- [ ] MORNING Practise at famedtestprep.com/brief. · 2 h
- [ ] AFTERNOON Practise writing or typing fluency according to the format. · 1 h
- [ ] EVENING Prepare a personal structure without filling in invented data. · 1 h

Sunday Review and consolidation

- [ ] MORNING Review all the writing topics and their variants. · 2 h
- [ ] AFTERNOON Write two medical histories from random cases. · 90 min
- [ ] EVENING Rest. · Rest

MY NOTES FOR THE WEEK

06 Week 6: Integration and full practice

Monday — Training simulation 1

- [ ] MORNING Two practice interviews and one Aufklärung. · 45 min
- [ ] AFTERNOON One Arzt–Arzt presentation as a partial exercise. · 15 min
- [ ] EVENING One written medical history and review of mistakes. · 90 min

Tuesday — Work on your weak points

- [ ] MORNING Practise the weakest task from Monday. · 90 min
- [ ] AFTERNOON Practise the second weakest task. · 90 min
- [ ] EVENING Review the vocabulary of those areas. · 1 h

Wednesday — Training simulation 2

- [ ] MORNING Combine the four skills with different cases; use the official format for a full simulation. · 2 h
- [ ] AFTERNOON Review the work with a study partner. · 1 h
- [ ] EVENING Note down improvements and remaining difficulties. · 1 h

Thursday — In-depth work by skill

- [ ] MORNING Anamnese: four random cases. · 90 min
- [ ] AFTERNOON Aufklärung: four random cases. · 90 min
- [ ] EVENING Writing: two exercises. · 1 h

Friday — Intensive Arzt–Arzt practice

- [ ] MORNING Practise six case presentations. · 2 h
- [ ] AFTERNOON Practise six more presentations. · 2 h
- [ ] EVENING Review your SBAR structure. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 6: Integration and full practice

Saturday Training simulation 3

- [ ] MORNING Complete the four skills with the five tasks of the current format. · 2 h
- [ ] AFTERNOON Compare with simulations 1 and 2. · 1 h
- [ ] EVENING Identify the last weak points. · 1 h

Sunday Rest and light review

- [ ] MORNING Review vocabulary without overloading yourself. · 45 min
- [ ] AFTERNOON Complete rest. · Rest
- [ ] EVENING Prepare for week 7. · Rest

MY NOTES FOR THE WEEK

06 Week 7: Fine-tuning practice and gaining fluency

Monday — Timed practice

- [ ] MORNING Four ten-minute interviews as training. · 1 h
- [ ] AFTERNOON Four ten-minute explanations as training. · 1 h
- [ ] EVENING Two texts with twenty minutes of active writing. · 1 h

Tuesday — Presentation marathon

- [ ] MORNING Eight Arzt–Arzt cases of ten minutes each. · 2 h
- [ ] AFTERNOON Eight additional Arzt–Arzt cases. · 2 h
- [ ] EVENING Review and improve your presentations. · 1 h

Wednesday — Mixed practice

- [ ] MORNING Random exercises of the four skills in the app. · 2 h
- [ ] AFTERNOON Work on transitions and empathy. · 1 h
- [ ] EVENING Repeat the difficult cases. · 1 h

Thursday — Training simulation 4

- [ ] MORNING Complete the five tasks of the current format. · 2 h
- [ ] AFTERNOON Carry out a detailed review. · 1 h
- [ ] EVENING Adjust your working strategy. · 1 h

Friday — Vocabulary and expressions

- [ ] MORNING Review the medical vocabulary lists. · 2 h
- [ ] AFTERNOON Practise common expressions for each skill. · 1 h
- [ ] EVENING Final review of Konjunktiv I. · 1 h

SEE THE FAMED PROTOKOLL 2026 BOOK →

06 Week 7: Fine-tuning practice and gaining fluency

Saturday Training simulation 5

- [ ] MORNING Complete the five tasks of the current format. · 2 h
- [ ] AFTERNOON Final review with a study partner, if possible. · 1 h
- [ ] EVENING Review your progress to build confidence. · 1 h

Sunday Rest day

- [ ] MORNING Very light review with flashcards. · 30 min
- [ ] AFTERNOON Complete rest, no studying. · Rest
- [ ] EVENING Quiet activity and an early night. · Rest

MY NOTES FOR THE WEEK

06 Week 8: Final preparation and exam

Monday — Light review

- [ ] MORNING Review SAMPLER, SBAR and OPQRST. · 1 h
- [ ] AFTERNOON Practise one case for each skill. · 1 h
- [ ] EVENING Review the ten common mistakes. · 30 min

Tuesday — Final practice

- [ ] MORNING Practise two Anamnese cases. · 30 min
- [ ] AFTERNOON Practise two Aufklärung cases. · 30 min
- [ ] EVENING Practise two Arzt–Arzt presentations. · 30 min

Wednesday — Building confidence

- [ ] MORNING Review your best exercises. · 1 h
- [ ] AFTERNOON Review vocabulary lightly. · 1 h
- [ ] EVENING Prepare the documents and materials for the exam. · 30 min

Thursday — Minimal study

- [ ] MORNING Quick review of common expressions. · 30 min
- [ ] AFTERNOON Rest and relaxation. · Rest
- [ ] EVENING Go to bed early and try to sleep eight hours. · Rest

Exam day — Exam day

- [ ] MORNING Have breakfast and arrive according to the instructions of your booking. · Exam
- [ ] AFTERNOON Stay calm and apply what you have practised. · Exam
- [ ] EVENING Acknowledge your effort and wait for the instructions on results. · Rest

FaMED Protokoll 2026

07 Exam-day tips

The day before

- Review key vocabulary, without trying to learn everything at once.
- Prepare your ID and booking confirmation.
- Try to sleep eight hours and set several alarms.

In the morning

- Have breakfast and bring water and something to eat if permitted.
- Check the exact address of your venue and arrive as early as your booking indicates.
- Follow a calm, familiar routine.

During the exam

- Use the reading time to identify the task and its essential information.
- Remember the current combination: one Anamnese, one Aufklärung, two presentations and one written medical history.
- The written time includes the video; keep an eye on the clock while continuing to listen.
- Use everyday language with patients, appropriate technical language with colleagues and complete sentences when writing.
- Ask for clarification when necessary and do not invent information.

Afterwards

- Check the organiser's deadline and procedure for results.
- Keep the instructions for receiving your certificate or arranging a retake if you need one.

SEE THE FAMED PROTOKOLL 2026 BOOK →

07 Your checklist

Week 1: Anamnese

- [ ] I understand SAMPLER and OPQRST.
- [ ] I have practised all the Anamnese topics on the list.
- [ ] I can listen, ask questions, summarise and show empathy.

Week 2: Aufklärung

- [ ] I have worked through all the procedures on the list.
- [ ] I explain purpose, procedure, risks and instructions using the information provided.
- [ ] I check that the patient has understood.

Weeks 3–4: Arzt–Arzt

- [ ] I have reviewed the cases by system.
- [ ] I organise the information with SBAR when it helps.
- [ ] I use appropriate terminology and keep two separate cases apart.

Week 5: writing

- [ ] I write the medical history in complete sentences.
- [ ] I use Konjunktiv I where appropriate.
- [ ] I have practised the cases and variants and checked dates and negations.

Weeks 6–8: integration

- [ ] I have completed five training simulations.
- [ ] For full simulations I follow the current official format.
- [ ] I have worked on my weak points and planned my rest.

Studying with others

Find a study partner or a preparation community, for example the Telegram link on our website. Share exercises and questions, arrange peer reviews and respect the rules of the group. Sessions, the number of members and the services available depend on the community; they are not guaranteed.

SEE THE FAMED PROTOKOLL 2026 BOOK →

08 Ten common mistakes — 1 to 5

1 Using ‘du’ instead of ‘Sie’

Incorrect	*"Hast du Schmerzen?"*
Correct	*"Haben Sie Schmerzen?"*

Use the formal form of address with patients and colleagues in these professional situations.

2 Forgetting to introduce yourself

Do not start straight away with questions. Practise:

> *"Guten Tag, mein Name ist Dr. [Name]. Ich bin [Funktion]."*

3 Speaking to the patient in medical jargon

Too technical	*"Sie haben eine Cholezystolithiasis."*
Understandable	*"Sie haben Gallensteine in der Gallenblase."*

Use Laiensprache with patients and Fachsprache with doctors.

4 Managing writing time badly

Do not spend almost all your time on the first part. Set aside time to watch the video, organise the facts, write and check. Do not add diagnoses, findings or treatments that are not in the source.

5 Underestimating Arzt–Arzt

Do not prepare only one presentation: the current format includes two. Allow enough time to organise the information, answer questions and keep the data of each case separate.

SEE THE FAMED PROTOKOLL 2026 BOOK →

08 Ten common mistakes — 6 to 10

6 Confusing the number of tasks

The original alternated between different figures. Practise the current format: one Anamnese, one Aufklärung, two presentations and one written task. Two interviews as training do not mean two Anamnese tasks in the exam.

7 Explaining the risks incompletely

Include the general and specific risks provided in the task, in understandable words. Do not invent risks or figures.

8 Presenting a case without order

Do not jump randomly from one topic to another. Use SBAR as an aid: situation, background, assessment and recommendation, always according to the information available.

9 Not mastering the written register

Practise the contrast:

> *"Wir haben die Patientin untersucht."*

> *"Die Patientin wurde untersucht."*

Choose the wording that suits the content. The passive voice can be useful, but it must not introduce an examination that does not appear in the video.

10 Panicking when you do not know something

Do not invent information. Practise:

> *"Das müsste ich noch abklären."*

Distinguish data that is absent from data you did not understand, and ask for clarification where appropriate.

SEE THE FAMED PROTOKOLL 2026 BOOK →

09 Resources to practise with

Exam simulation and practice

famedtestprep.com/exam

Practice by skill

Anamnese: famedtestprep.com/anamnese

Aufklärung: famedtestprep.com/aufklaerung

Arzt–Arzt: famedtestprep.com/medicalcases

Writing: famedtestprep.com/brief

Build these resources into the sessions in the calendar. Availability and limits depend on the current plan. The app's examples and answers are training material, not official exam results.

There is also a book + 90 days of the app bundle:
Everything is optional: you do not need to buy anything to use this guide.

10 Your preparation, step by step

To make the most of these eight weeks:

1. Understand the current format and tell the five tasks apart.
2. Practise the topics on all the lists, without treating those lists as predictions of the exam.
3. Work on the two Arzt–Arzt presentations and keep their cases separate.
4. Practise the written medical history with the video and the current timings.
5. Keep a daily routine you can sustain; adapt the two- or three-hour proposal and the intensive days to your needs.

You can make progress with a steady routine. Eight weeks is a proposal for organising your study, not a guarantee of passing or of being ready by a fixed date.

Go back to your exercises, identify one specific mistake, correct it and repeat. Combine speaking practice, listening and writing from the start.

Best of luck with your FaMED preparation!

FaMED Prep · independent preparation resource

famed-vorbereitung.com

Complete English edition based on the original guide. Format revision: 21 October 2026. We keep the case names and the German examples. The editorial corrections resolve the contradictory timings and counts of the original, without cutting its study sessions.

Official source for the format: famed-test.de/pruefungsablauf/
